## Tec/ Decompression Diving Policy

- All guided dives will be within the recognised recreational diving limits of 40m (130ft).
  
- Guests who plan to do decompression dives should be experienced in decompression diving, have suitable qualifications, and will be requested to sign a specific waiver upon boarding. Insurance is a must!
  
- Guests are responsible for their own dive profile & dive planning. Siren Fleet dive crew will NOT provide a decompression dive plan.
  
- Siren Fleet dive crew will guide guest divers through basic wreck penetration where it is suitable, i.e. clear day light and open spaces for "easy" access & ascent to the surface if necessary.
  
- For guests who plan to do full wreck penetration, the Siren Fleet cruise director will give an in-depth briefing prior to each dive using maps with entry/exit points, interesting features, hazardous objects & environmental conditions (e.g. silt, viz, current/ surge).

**IMPORTANT\*\* \*\*\*Please note that Bikini Atoll is a technical diving destination and not suitable for recreational divers and those without technical training\*\*\***
